Let us honour and remember those who precede us in death.

Creating a permanent memorial for a loved one serves to link generations, honour the past, preserve our heritage and direct our future.

It is never too soon to set up a visual symbol in beautiful and safe surroundings that perpetuate cherished memories.

It is recommended that families make their memorial selection in advance in order to eliminate decision making during the delicate time of grieving.

Each Pillar of Remembrance provides for niches that can accommodate 2 cremations each.

Every niche is finished with a memorial plaque for personalised inscriptions.

The Pillar of Remembrance is space efficient, can be erected at any location (church grounds, gardens, parks, etc.) and requires only a site plan for local authorities.

The Polymer Concrete material is four times stronger than conventional concrete, and more resistant to chemical wear, climatic conditions and carbonisation. It also resists thaw/freeze factors.

Patent no: 2011/0402
